

THANGARASU SELVAM

Software Engineer

+91-(637)-411-1470 thangarasuselvam96@gmail.com linkedin.com Bengaluru

SUMMARY

Full Stack Software Engineer with 6+ years of experience building scalable backend systems and enterprise applications across e-commerce and airline domains. Strong expertise in Java, Spring Boot, Quarkus, Angular, and cloud-native microservices architecture. Experienced in REST APIs, AWS Lambda, CI/CD automation, observability, and performance optimization. Proven track record of delivering production-ready features, improving deployment efficiency, and building scalable systems in agile environments.

EXPERIENCE

Specialist Software Engineer

LTM 10/2025 - Present Bengaluru

- Developing and enhancing customer-facing and backend features for enterprise airline applications using Java, Quarkus, and Angular.
- Building and maintaining serverless workflows using AWS Lambda for scalable event-driven processing.
- Improved debugging and production monitoring efficiency by analyzing and optimizing application logs and runtime tracing.
- Collaborating with cross-functional teams to deliver feature enhancements in agile sprint cycles with faster release turnaround.
- Contributed to frontend module development using Angular, improving UI responsiveness and maintainability.
- Supporting backend API development and integration for high-availability airline systems.

Senior Software Engineer I

Zemoso Technologies Pvt. Ltd.

08/2024 - 09/2025 Hyderabad

- Migrated a legacy monolithic Spring application to Spring Boot, reducing deployment time by 40% and improving maintainability.
- Built a Seeder Configuration Management platform using Spring Boot and ReactJS for centralized configuration handling.
- Integrated Prometheus and Grafana monitoring, reducing incident detection time by 35%.
- Automated CI/CD workflows using Jenkins, reducing deployment failures by 90%.
- Collaborated with QA and DevOps teams to simulate sensor failure scenarios and improve system reliability.
- Participated in sprint planning, code reviews, and agile delivery processes across cross-functional teams.

EDUCATION

B.E. – Computer Science and Engineering

JCET 06/2016 - 06/2020 Dharmapuri

Higher Secondary Course (Maths–Biology)

Govt HSS 06/2011 - 05/2013 Kallavi, India

LANGUAGES

English Proficient Tamil Native

PROJECTS

Delta Airlines Enterprise Platform

- Built and enhanced full-stack enterprise features supporting airline operations and customer experiences.
- Built scalable backend APIs and serverless AWS Lambda integrations for enterprise workflows.
- Enhanced frontend modules using Angular for improved user experience and maintainability.
- Improved application observability and issue tracking through centralized logging and monitoring.
- Collaborated with cross-functional teams including QA, DevOps, and business stakeholders to deliver features in agile sprint cycles.
- Optimized API performance and application stability by improving error handling, logging strategies, and backend processing workflows.

Electronics E-Commerce Platform

- Built backend services for catalog, cart, orders, and payments using Spring Boot and Laravel in a microservices setup.
- Designed a SKU ingestion pipeline supporting 10K+ products with validations, indexing, and bulk import/export.
- Enabled real-time payment processing and automated transaction reconciliation workflows.
- Implemented RBAC (Role-Based Access Control) to manage user roles and access levels across modules.
- Used Elasticsearch for fast and flexible product search and filtering, improving user navigation and discoverability.
- Applied Redis caching and optimized DB queries to reduce load times and enhance overall platform performance.
- Integrated Kafka-based asynchronous communication to improve service scalability and reliability across distributed modules.
- Collaborated with frontend and DevOps teams to streamline deployments, API integrations, and production issue resolution.

SKILLS

Backend & Frontend

Java, Spring Boot, Quarkus, PHP, Laravel, REST APIs, Microservices, Kafka
Angular, ReactJS, JavaScript

Cloud & DevOps

AWS Lambda, EC2, S3, Jenkins, Docker, CI/CD

Databases, Tools & Monitoring

MySQL, MongoDB, Elasticsearch, Redis, Git, Swagger, Postman
Prometheus, Grafana, Agile/Scrum, Code Reviews, Clean Code
